

# SUCHIT GOLED

Bangalore, India | 📞 +91 7676716597 | ✉️ suchitgoled@gmail.com | 🔗 LinkedIn | 🐙 GitHub

## Professional Summary

Electronics and Communication Engineering student with hands-on experience in MERN stack development, IoT systems, and AI-driven applications. Skilled in building scalable web applications using React.js, Node.js, Express.js, and MongoDB along with developing embedded and real-time monitoring systems. Passionate about creating impactful technology solutions through hardware and software integration.

## Technical Skills

|               |                                                                    |
|---------------|--------------------------------------------------------------------|
| Languages     | JavaScript, Python, C, C++, SQL                                    |
| Frontend      | React.js, HTML5, CSS3                                              |
| Backend       | Node.js, Express.js                                                |
| Database      | MongoDB                                                            |
| Tools         | Git, GitHub, VS Code, Arduino IDE, HFSS, MATLAB                    |
| Core Concepts | MERN Stack, REST APIs, IoT, Embedded Systems, OOP, Data Structures |

## Internship Experience

Full Stack Web Development InternJan 2026 – May 2026

- Worked on frontend and backend web development using modern web technologies.
- Built responsive web interfaces and integrated REST APIs.
- Gained practical exposure to MongoDB database management and full-stack workflows.
- Improved understanding of scalable web application architecture and deployment concepts.

## Projects

### Electronova – MERN Stack E-commerce Platform

- Developed a full-stack electronics shopping platform using React.js, Node.js, Express.js, and MongoDB.
- Implemented dynamic product management, admin panel functionalities, and responsive UI components.
- Designed REST APIs and integrated MongoDB for efficient product handling.

### Product Catalog Generator

- Built an AI-powered product catalog generation system using image processing techniques.
- Automated extraction of product details and generation of structured descriptions.
- Worked on AI prompt engineering logic for intelligent content generation.

### Smart Inhaler System

- Developed an IoT-based air quality monitoring system using Arduino Uno and MQ135 sensor.
- Integrated GPS and mobile application alerts for real-time monitoring.
- Implemented notification mechanisms for high CO<sub>2</sub> levels.

### AI + IoT Smart Bandage

- Designed a smart wound monitoring system using ESP32 and sensor integration.
- Monitored pH, oxygen, and healing conditions in real time.
- Explored AI-based predictive healthcare monitoring concepts.

## Education

|                                                                     |             |
|---------------------------------------------------------------------|-------------|
| Acharya Institute of Technology, Bangalore                          | 2022 – 2026 |
| Bachelor of Technology in Electronics and Communication Engineering | CGPA: 7.9   |
| Konnur Science PU College, Bagalakote                               | 2020 – 2022 |
| PCMB                                                                | 88.6%       |

## Hackathons

---

### Build for Bengaluru Hackathon

2025

- Developed Smart Inhaler healthcare monitoring solution during a 12-hour innovation hackathon.

### Promptathon by IVIS Labs

2025

- Built an AI-powered Product Catalog Generator using prompt engineering and image processing.

## Certifications

---

- Infosys Springboard – Python Fundamentals
- Coursera – Data Analytics with Python
- Coursera – The Arduino Platform and C Programming
- Coursera – Wireless Communications for Everybody
- NPTEL – Embedded System Design with ARM
- Scaler Topics – Python and SQL for Data Science

## Soft Skills

---

Problem Solving • Team Collaboration • Communication • Adaptability • Quick Learning
